

APPLICATIONS FOR SUPPORT

AREA	TARGET
Flavour usage	Information on nature-identic status (tobacco) of various substances (e.g. furanones) Support for reaction flavours
Advanced recon tobaccos	Support for ammonia treatments Support for extruded products
Advanced products	Support for balance of smoke composition

401058355

RESEARCH GOALS

APPLICATION	Initial Research Objectives
Flavours	Define criteria and methods for claiming tobacco/smoke natural status—samples, artefacts, standards of identification, purity
Recon and advanced products	Develop methods and standards of comparison to relate a) Composition of smoke by components b) Substrate composition of novel materials to traditional products

))

RELEVANT PROJECTS

GREENDOT
DEER AND ITS DEVELOPMENTS.
SHEET (AMMONIA) TECHNOLOGY
EPCOT.

TECHNICAL REQUIREMENTS

GLYCEROL CONTRIBUTION TO
SMOKE CHEMISTRY.
HPC EFFECT ON SMOKE BALANCE.
AMMONIA CONTRIBUTION TO
SMOKE NITROGEN COMPOUNDS.
DEFINITION OF SMOKE AND
TOBACCO STANDARDS.
