

File Canada

Note for Mr E A A Bruell

As agreed at our meeting following my visit to Canada in December, I sent my note summarising the views of Canada on GREENDOT/DAY to Jean-Louis Mercier. I enclose a copy of my letter to him and his reply. You will note from this that ITL agreed with the basic points covered in the note and with the conclusion, therefore, that ITL support Project GREENDOT.

For interest, I am also enclosing a copy of a letter that relates to a significant part of the fundamental research programme being undertaken for the Group at Southampton (and funded by CAC's). The technical detail is not of particular importance but you may be interested to see the generally supportive comments that ITL express. These comments hopefully mean that ITL will be willing to participate at least in the Southampton element of the Group R&D funded programme.
