

Flavour Legislation (B & W)

At B & W two persons within R & D are authorized to see/review qualitative flavour disclosures from flavour houses. The action steps for flavour reformulation, when recommended by the B & W Additives Review Committee, are detailed in the appendix.

Coordination of the Use of Additives on BAT Products (BAT (UK & E))

BAT (UK & E) is currently developing a computer based data bank on all additives used on tobacco products in all the BATCO companies. This includes all additives used in tobacco, paper, filter, glues, packaging.

Imperial Tobacco Projects (ITL)

Two representatives from ITL's Marketing Division, Herb Roubicek and Andrew Chan, presented two future projects to the group. These projects, by their very nature, may involve the use of flavours and exposing the concepts to the delegates and obtaining their comments was beneficial. The two projects presented were :

Saturn - improved smoking quality
Visa - social acceptability
