Dear Pat

Please find enclosed a copy of a Harwell report in which is described a review of the general topic of radioactivity and smoking. This work was carried out on contract to the R&D centre in Southampton and is based on information published in the open literature.

Whilst the document has a high technical content, we have tried to make the subject matter more readily digestible through individual section summaries which can be found at the end of each section.

If you need clarification of any points which arise or require further information, please do not hesitate to contact us.

Yours sincerely

D.P. Robinson
