Mr. H.F. Dymond,
B.A.T.,
Group Research & Development Centre,
Regent's Park Road,
Southampton.
SO9 1PE

Dear Harry,

This is to confirm that a meeting to discuss the analysis of N-nitrosamines in cigarette smoke will be held at the Research Department of ITL on Thursday, June 11th starting at 9.45 a.m. Will you please let me know who will be coming (a maximum of two from each company) and if you wish us to arrange accommodation.

As agreed at the last CSC meeting, ITL will give a short paper on methodology and this should provide a starting point for our discussions. The proposed agenda is as follows:-

1. Introduction
2. Paper by ITL on methodology for the determination of nitrosamines
3. Storage, handling and disposal of nitrosamines
4. Collection of cigarette smoke
5. Isolation of a nitrosamine fraction
6. Separation and determination of nitrosamines
7. Any other business.

Yours sincerely,

A.S. Weaving
