Dear Ray,

Thank you for your letter dated 22nd February concerning the fractionation meeting which Pat has passed on to me for reply.

I confirm that Minoo Billimoria will be attending the meeting and he will be arriving on Sunday 24th April and departing during the afternoon of Friday 29th April. I am suggesting that Minoo goes into GR & DC at around 10:30 AM on Monday 25th and spends some time setting up the discussion programme for the week. I have set out below the main areas that Minoo would like to discuss:-

1. Informal review of McGill studies i.e. ambient smoke work and milk and placental transfer studies.
- ✓ 2. Ames joint study data - discussion of differences.
3. Correlations between mutagenicity data and skin painting data for Janus series cigarettes (i.e. B-9 onwards).
4. Determination of carbon monoxide in rat blood.
5. GR & DC programme in general but in particular the studies on inhalation, mutagenicity, biochemistry of chemical carcinogens, tests related to irritation and models for atherosclerosis.

6. Discussions on why lung and kidney S-9 do not activate BaP and CSC.
- ✓ 7. Detailed discussion of the cigarettes to be used in the proposed fractionation studies.
8. Status of biological studies relating to nicotine.
- ✓ 9. Biotechnology with IGM.

Many thanks in advance for making the arrangements for this visit and I am sure the discussions will be most fruitful.

With kind regards,

Yours sincerely,

S.R. Massey
