Mr J. Schaffers  
P.O. Box 2  
1100 West Street  
Hastings, N.S.

Dear Mr Schaffers

Enquiry No. 320

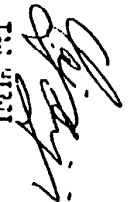

This enquiry confirms that there is a strong positive correlation between schizophrenia (schiz) and the presence of subjective experiences of alienation from (temp, emotional and physical), "feeling separated" or "feeling out of touch" with the world. Further subjective evidence also indicates evidence of elevated alpha activity.

I hope this enquiry provides useful background information.

I would be pleased if you could confirm receipt by returning the copy acknowledgment slip (which is attached to the report).

With kind regards,

Yours sincerely,

David H. Hall
