1005 AJ Amsterdam  
Netherlands

Dear Mr Scheffers

REPORTS T.106 AND 2D.2117

Please find enclosed two further reports on the investigation of tobacco specific nitrosamines in leaf samples. These concentrate mainly on the examination of Burley grades and attempt to correlate nitrosamine levels with a number of other chemical constituents, with a view to identifying the precursors of tobacco specific nitrosamines.

Would you kindly confirm receipt by returning the copy acknowledgement slip which is attached to each report.

With kind regards,

Yours sincerely,

  
TAJ MIRJI
