Further to Dick Brentnall's recent discussions with you, there are a few points which I would like to confirm:-

1. UPC codes are as follows:-

20s pack - 028052 00005 2 (zero suppressed to 0280525 2)

200s outer - 028052 02012 8

The attached photocopies should be of assistance.

2. Please could you confirm whether you require any special markings on the 5 mille case (apart from shipping mark etc).

3. I understand that the fact that the '555' on the top of the lid on the BATUKE layout is facing the opposite way to the Canadian style was raised. The BATUKE layout is the standard used throughout the world for State Express and as I assume this is just a question of 'style' we are not in a position to amend it.

4. I would be grateful if you could confirm if you have received the PMTs of the 200s artwork sent to you by courier on 19th December.

Regards

VIVIEN BECHER
