Mr. C. Seymour
Executive Secretary
Canadian Tobacco Manufacturers Council
1808 Sherbrooke St. West
Montreal, Quebec
H3H 1E5

Dear Mr. Seymour,

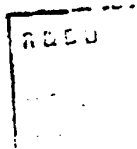

Enclosed is a brief progress report of my work this (4th) year for Phase III of the research project. The study is still in progress and with luck all subjects should be tested by the end of November. Once the analysis is finished I will assemble the data and findings together for the entire four years and give a formal presentation to C.T.M.C. members in January or February of next year.

As mentioned in a previous letter, I am preparing a more detailed account of procedures and budget requests for the coming five year project which is to start this January, 1981. Hopefully this will be ready by November so that a meeting can be set up with C.T.M.C. to go over the final details.

Sincerely,

Verner J. Knott, D. Phil.
