I hope we can accommodate your request. OK?

December 9, 1980

Yes. Have already discussed with RSN/CWA

Dear Lionel:

I understand Bob Wade has raised the question with Jeremy Wood as to whether GRDC could assist in a program to determine Ridomil residues in treated flue cured tobacco. (See attachments) It would seem desirable to have an independent check of analyses to be conducted by Ciba-Geigy, and also to explore residues in greater depth than will be possible through the limited testing (10 samples) offered by Ciba Geigy.

I would hope this program may be deemed to be of general interest by, for example, the Leaf Steering Committee, and that GRDC is able to undertake this work. I would suggest, on the assumption of a favourable view at your end, that detailed arrangements be made directly with Graeme Boswall here.

With kind regards,
and Season's Greetings.

Yours sincerely,

Bob
