ADDITIVES GUIDANCE PANEL

Following the A.G.P. meeting of yesterday the writer has spoken to Machinery Services Department who originally requested on behalf of Canada an A.G.P. approval of Tuermerleim Adhesives NAT3 and NAT5.

Machinery Services Department advise that Canada are now using a local purchased adhesive on the imported Molins machines and therefore at this time there is no interest in the two Tuermerleim adhesives.

It has been agreed that these two items can be deleted from the A.G.P. minutes.
