Dear Bob,

PCL Additives: AGP Clearance

Further to your letter of 31st March to Dr. Felton on this subject, the initial AGP assessment of the materials indicates that we would not object to the use of any of them at the proposed levels. This is subject to confirmation at the next AGP meeting which should be held in 4 weeks time. However, we would like confirmation from the suppliers that neither wet strength agents nor optical brighteners are added to Aqualon or Chemical Cotton (ex Hercules) or Solka Floc (Brown Co.).

I should be grateful if you would approach them for this information on our behalf.

With kind regards,  
Yours sincerely,

T. G. Mitchell
