Dear Stuart,

You will see from the enclosed correspondence that, some years ago, we were asked to examine Industrial Adhesives PD 716 for side-seam applications. For some reason, whoever needed to know did not receive the information although it was, of course, recorded in the AGP minutes as 80/32 dated 11.12.80. I think the confusion arose through someone directing Industrial straight to us rather than having any named contact in Imperial.

I hope you may be able to inform the right person!

Yours sincerely,

T G MITCHELL
