AGP MINUTE NO. 82/34

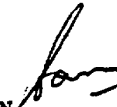

Industrial Adhesives (Canada)  
Cigarette Seam Adhesive R0760

Thank you for your memo of 25th November and for the confidential disclosure from Industrial Adhesives, Toronto.

I note that this is a revised list following your request in relation to the antifoam agent.

I can see no reason why this adhesive should not be used for side-seam application, but consider that, since it is a new supplier as far as I am aware, we should seek reassurance that the components meet the standards applicable for "Indirect Food Additives", i.e. FDA/CFR and 175.105.

ccs: Dr. D.G. Felton
