Dr P J Dunn
Mr E Kohnhorst
Herr E Rittershaus
Dr C J P de Siqueira

Items for Publication

Our established Group system whereby any article to be published is first shown to the other CAC laboratories showed signs of frailty when recently tested in the context of proposed papers for the Tobacco Chemists' Research Conference.

The major problem was the lateness with which proposed papers were circulated. Perhaps this was the reason why subsequently views were hastily given and later modified. A period of two weeks for receipt would seem a useful future guideline for comments to be given.

I hope this suggestion will avoid any future problems in this area.

With kind regards

Yours sincerely

A L Heard
