

To: D.S.F. Hobson, Esq.
Sir Charles Ellis.

From: S.J. Green.

Report RF.533-R examines the general claim that Polonium-210 can be selectively filtered. It appears that selective filtration is possible. Some useful information is given on filtration efficiencies for Polonium-210 on various filters. I think I should send a copy of this to New Zealand and by copy of this letter, I should like R. & D.E.'s comments on the possibility of this report going to T.R.C.
