

Green

To: D.S.F. Hobson, Esq.
Sir Charles Ellis.

From: S.J. Green.

Report RD.532-R covers our first attempt at a prototype filter tipped cigarette with reduced biological activity. It has been possible to achieve a successful result as far as the chemical analysis of the smoke is concerned. I believe this is a very important report and intend to discuss the next steps with R. & D.E. Meanwhile, I am doubtful of the value of further circulation, other than to research departments, although I should welcome your advice on this.
