

**TO: D. S. F. HOBSON, ESQ.
SIR CHARLES ELLIS.**

FROM: S. J. GREEN.

I believe Report RD. 578-R could be of enormous importance in product development and presents one of the most attractive computer applications in our R. & D. work so far. When Dr. Kilburn has developed his computer programme he will be able to reduce the work involved in the first level of interpretation of smoke differences by over 90%.

S. J. GREEN.
