

RD. 480-R

TO: D. S. F. HOBSON, ESQ. FROM: S. J. GREEN.  
SIR CHARLES ELLIS.

Report RD. 480-R continues the work on sodium nitrate cigarettes started in 455-R. In report 455-R 3 puffs/min. was used to match the condition of Eastman which led to non-carcinogenic tar. In this report our usual smoking conditions are applied. This change in puffs/min. has caused a greater effect than sodium nitrate and is really quite exciting. It is being followed vigorously.

*ll*  
S. J. GREEN.
