TO: D. S. F. HOBSON, ESQ. **FROM: S. J. GREEN.**
SIR CHARLES ELLIS.
K. E. HAINES, ESQ.
N. M. GILLIAM, ESQ.

Herewith R. & D.E. report RD.463-R. This will be discussed at the next Additives Meeting but my present recommendation is that there is no ground for making any change in current humectant usage. Where irritation is established as a problem the substitution of propylene glycol for glycerol might be tested experimentally and this might provide evidence for making a change.
