Arial Smoking Devices

Here is Report RD.410-R. The circulation is very restricted at present and no work is currently being done on this project. There is no urgency in reaching a decision whether to continue this work but I would like the opportunity in September to develop the case for its continuation, which I think is quite inadequately dealt with in the report itself. I have discussed this with Mr. Dobson, who has seen a sample. Further samples are available in the conditioned store in the building.

The samples are hand assembled and are intended merely to indicate the feasibility of the project.
