REPORT RD.1072-R

In this report, the in-house acute toxicity tests are reviewed in terms of their long-term reproducibility, predictive ability and relevance.

It is recommended that two of the tests in current use are discontinued.

Two copies of the report are attached in case you wish to send a copy to Bristol, but Geoff has deleted ITL from the distribution.

Vo.

S.R. Evelyn

Enc.

No distribution in Millbank etc.
