REF SRE/PSD/46D and 46A DATE 27th November, 1975

"A" Versions of Three Reports

Enclosed are "A" versions of the following reports:

- RD.1246-A: A Versatile Exposure System for Inhalation Toxicity Studies on Cigarette Smoke.
- RD.1259-A: Tobacco Smoke Inhalation Dosimetry Studies on Small Laboratory Animals.
- RD.1280-A: Tobacco Smoke Inhalation Dosimetry Studies on Rats.

The overseas laboratories have been contacted in relation to the first two reports and the replies indicate that they have no objections to their publication.

The "A" versions have been produced for T.R.C. and I would be pleased if you would send a copy of each to Glen House. The reports should be treated as "Confidential until Published". 28/11.

You will probably recall, from my notes on the recent meeting, that I mentioned 'pooling' to Dr. Fairweather and this produced an interesting reaction.

Would you consider that copies of two reports (RD.1259-A and RD.1280-A) should be sent to Fairweather at the present time? The report on the four species (RD.1259-A) should be of particular interest to him but I would not consider sending him a copy of RD.1246 as he already has details of the smoking machine.

*yes - why not?
They have
gone to TRC
