Dear Wally,

We have taken advice in Switzerland and it appears likely that Baumgartner's SR.II cavity filter would be held in a Swiss Court to infringe your B & W Patent 502,074. We have not decided yet whether we would wish to take this up with Baumgartner. But if we do we may come back and ask for your help in pursuing this.

At this stage perhaps you would discuss the implications only so that when we have decided what we wish to do we shall be able to get a quick response from you.

With kind regards,
Yours sincerely,

S.J.GREEN
