Dr. D.G. Felton,
Southampton.

Dear Geoff,

Re Research by Dr. J.H. Burgess on
"CORONARY CIRCULATORY SYSTEM
USING NICOTINE AS A STIMULANT"

With reference to the above subject matter, on checking
back in our file, it would appear that you did not get
a copy of the following correspondence:

Dr. Burgess' letter of 10 Jan 68 to Dr. Parker Chesney,
Dr. Chesney's letter of 20 Jan 68 to me,
My letter of 24 May 68 to Dr. Burgess.

A copy of the foregoing is now enclosed, and also a
copy of interim report, dated May 10, 1971 from Dr.
Burgess.

The findings so far seem quite interesting and I would
appreciate receiving your comments, particularly your views
on the possibility of further financial support to continue
this project.

With kind regards,

Sincerely,

L. G. Lapotte.

Dr. S. J. Green, London
