Dr. D.G. Felter
Southampton via Brussels

Dear Geoff,

In my letter of January 20, regarding Dr. Wagg's report covering his visit to the U.K., I mentioned that I expected to receive from him a proposal for a Research Project for consideration by the Canadian Tobacco Manufacturers Council. I have now received this and enclosed is a copy of his letter dated February 1, along with a copy of his Application for a Research Grant, Curriculum Vitae, and list of publications.

You will note that the title of this project is, "The distribution & handling of smoke aerosols in dog lungs", and that it has received the approval of Dr. Robert Moro, and Dr. Alan Mann for the Department of Pathology and the University administration.

Personally, I think this is a good project and am all in favour of having the Canadian Council approve this grant. I would, however, appreciate receiving your comments as soon as is reasonably possible.

With kind regards,

Sincerely,

L.C. Laporte.
