

December 14, 1970

Dr. D.G. Felton,
Southampton.

Dear Geoff,

Herewith is a copy of a letter dated December 4,
and attachments, from Dr. Edith Mankiewicz of the
Royal Edward Chest Hospital, Montreal, asking for
financial support by the Canadian Tobacco Industry
for a research project entitled,

"Pulmonary Carcinoma in Rats: A Model for the
Study of the Histological Stages of the Disease
and of the Immunological and Enzymatic Changes
Preceding and During Its Evolution".

I would appreciate receiving your thoughts regard-
ing this proposal, before January 12, if possible,
since I expect we will be having a meeting of the
Ad Hoc Committee on that date. I would like to
bring forward this proposal along with other similar
proposals at that meeting.

With kind regards,

Sincerely,

L.C. Laporte.
