17th July, 1959

D. S. F. HOBSON, ESQ.,
MILLBANK.

Dear Mr. Hobson,

You may be interested in reading the enclosed notes by Dr. Felton on Dr. Wynder's lecture at the Royal Marsden Hospital on the 6th July, and which I and Laporte also attended.

We were not able to stay to the end as we had left our papers in Millbank.

I think you will gather our feelings towards Dr. Wynder from reading these notes. He was very anxious not to miss anything and countered every suggestion of a sensible nature with the remark that he had that investigation in hand, or that he intended to do work on that subject. We understand that after we had left the discussion included a mention of free radicals and again Wynder apparently intends to include these in his future work.

Yours sincerely,

Encl:

HDA
