

SIR CHARLES ELLIS, F.R.S,  
MILLBANK.

D.G. FELTON,  
SOUTHAMPTON.

DGF/BMS/46D

4th October, 1962

Dear Sir Charles,

I trust that this reaches you before you leave on your trip to America. Further to our discussion this morning on the telephone regarding the possible I.M.S.C. investigations with Frankfurt, I attach a copy of the relevant paragraph taken from Bentley's unpublished and uncirculated Research Paper No.5, dealing with the effects of tobacco smoke and smoke condensate on laboratory animals.

It would seem from this that Bentley is right in thinking that one of the proposals has already been covered to some extent.

Yours sincerely,

D.G. FELTON
