2nd June, 1959

C. H. James, Esq.,  
Secretary,  
Tobacco Manufacturers' Standing Committee,  
6-10, Bruton Street,  
LONDON, W.1.

Dear Mr. James,

I am sorry to be so long in replying to your letter of 21st May regarding the request from Dr. Royer (Curie Foundation) for information on our work on platinum diamino-nitrite.

I believed at the time I spoke with you over the 'phone that you had received a copy of our Report No. RD.34A, which had been passed to Mr. Hobson. As you have not I am sending herewith Copy No.7 on which we have struck out in ink the references to this Company which we feel should not be passed to Dr. Royer.

You will see that Johnson Matthey played an important part in this investigation, and therefore I think it would be difficult not to bring them into the picture.

If, on reading the report, you think that it should be amended as we have suggested and sent to Dr. Royer, I think it would only be fair that you should write to Johnson Matthey and tell them of Dr. Royer's interest.

Yours sincerely,

Encls: 1
