Dear Dr. Green,

Thank you for your Quarterly Report covering the months  
January to March, 1962.

There are several points in this Report I should like to  
discuss with you when I visit you in June.

I notice on page 27 of the Report that large scale  
experiments on the use of Cation Exchange for improving the colour of  
VS/PCL were unsuccessful.

I shall be very grateful if you would keep me in touch  
with further developments on this topic.

Yours sincerely,

*W.W. Reid*
