Dr. S. J. Green, Esq.,  
Research and Development Establishment,  
British and American Tobacco Co., Ltd.,  
Regent's Park Road,  
Southampton, England.

Dear Dr. Green,

Thank you for the Report covering the work of R. & D. E. for April, May and June. I found this most interesting, particularly the complexity of the volatiles released during drying. The large number of carbonyl compounds is of interest, because I am finding a fair number as oxidation products of the resins. The mixture is complex, and will probably prove more so, when we have our V.P.C. At the moment we have to rely on paper-chromatographic methods.

With kind regards,

Yours sincerely,

W. W. Reid.
