 SOUTHAMPTON. SO9-1PE. ENGLAND.

Dear Geoff,

I am enclosing, as promised, three copies of Peter Isaac's Interim Report.

Peter produced this in some haste and makes no claims for its perfection. However, it will give you some idea of the direction in which their work is moving. They are very willing to accept suggestions and a measure of direction from us, and to help us in this I would appreciate the comments of Millbank and Southampton in this connection.

Also enclosed is an abstract of a paper being given to-day at Sydney Hospital, by Peter Isaac, which you may find interesting.

Peter's notes for the paper are also enclosed for your interest. These, naturally, make no pretence to be anything more than a "speaker's guide", and should be read with this in mind.

Kind regards,

Yours sincerely,

*B. i.*

P.S. You will notice in the bibliography of the Interim Report that reference is made to two R. & D.E. Reports. These were passed on some considerable time
