

SECRET

To: Mr. A.L. Heard

Tobacco Strategy Review Team

Attached for your information are the minutes for the part of the Tobacco Strategy Review Team which you attended on 17th September.

One other item which arose during the meeting which is relevant to your work was a suggestion by the Chairman that there should be further research to characterise the decomposition products of cigarettes which have been ammoniated.

Because of the subject matter of these minutes, there are special arrangements for their security and I have been asked to remind you that in accordance with the note sent out by the Company Secretary on 21st February

- (a) No copies should be made of this document.
- (b) Discussions with colleagues of items from the minutes should be restricted to a 'need to know' basis.
- (c) The minutes should be stored in a locked cabinet to which access is strictly limited to the recipient and his secretary.
