JANUS B14 and B15 EXPERIMENTS

I would be grateful if you could let me have a brief but definitive note on the outcome of these studies following your recent re-analysis of the data occasioned by the errors caused by the contract research laboratory. I wish to circulate this document before the Biological Research Meeting to be held on 19 and 20 May and would, therefore, like to receive your document by 15 April at the latest.

R. E. THORNTON
