

DCF/VC/460-2

23rd November, 1966

Dr. G. Königsmann,
Battelle Institut E.V.,
FRANKFURT AM MAIN N13,
Miesbadenerstrasse.

Dear Dr. Königsmann,

Thank you for your letter of 15th November enclosing a copy of your letter to A.S.L. Farms regarding the supply of animals, and your discussions with Mr. Edwards.

In the meantime, I have heard from Dr. Miedreich giving the details of nicotine and tar contents of the various condensates produced at different puff volumes. We all seem to be agreed that the high toxicity of the condensate produced by 10 ml. puffs cannot solely be attributed to the nicotine content and, as we agreed at your visit, this raises very interesting questions which need careful examination.

It was very nice to meet you and I look forward to further contacts in the future.

With kindest regards,

Yours sincerely,

C.c. Dr. W. Schwick

Dr. H. Miedreich
