

BRE/105/460-2

22nd November, 1966

Dr. H. Kramer,
Battelle Institut e.V.,
Frankfurt Am Main 13,
Wiesbadenstrasse,
W. Germany.

Dear Dr. Kramer,

Under separate cover I am sending you four samples for
Ciliastasis testing. These are coded C118, C119, C120, C121 and will
be despatched by air post within the next two days.

Each consists of a 15 mm filter attached to a 80 cigarette and
should be smoked to a butt length of filter tip plus 8 mm.

I would confirm my second telephone conversation with
Dr. Miedreich in that we would like cigarettes C112 and C113 tested
with the end filter section removed exactly as in the previous
experiment.

Yours sincerely,

S. J. Green
