Dr. A. Hofmann,  
Battelle Institut e.V.,  
Frankfurt am Main, W.13,  
Wiesbadenerstrasse,  
West Germany.

Dear Dr. Hofmann,

Hyperplasia Test - December

Dr. Ayres has asked us to arrange the December test as follows:

1. Cigarette BC 3 x 50 mg Condensate
2. Cigarette 268R 3 x 50 mg Condensate
3. Cigarette 268R 3 x 50 mg Neutral fraction
4. Cigarette BC 3 x (50 mg Condensate + 100 µg HF)
5. Cigarette BC 3 x (50 mg Neutral fraction + 100 µg HF)

The cigarettes coded 268R will have a much lower puff number than BC and the delivery of condensate will probably be 30 - 40% lower. Thus it will be necessary to smoke a corresponding greater number of cigarettes and we are sending you 6,000, 268R by air freight.

Yours sincerely,

S.R. Evelyn
