DATUM:

11th March, 1966

Dear Dr. Ayres,

I acknowledge receipt of your letter dated 3rd March, 1966. The new scheme for distributing the mice within our animal rooms A, B, C, and D has been discussed with Drs. Eder and Hofmann and is fully accepted. The spare mice, however, will be kept in the quarantine room because we want to keep the rooms A, B, C, and D free from mice not yet introduced into a test. We are quite sure that this minor deviation from your scheme will find BAT's approval.

Enclosed please find a drawing which shows the mice distribution according to the new scheme. The quarantine room is not shown because its function is only to keep the mice during the four quarantine weeks and to house the spare mice.

On 5th March, we received a cable from Mr. Edwards, ASL Farms London, concerning their nucleus of ICI mice. "Further information" has not yet arrived. Therefore, I am enclosing a copy of this cable now. In our opinion it would be best to have any negotiation with ASL Farms on a replacement of the nucleus by a new one from ICI - should this be necessary - to you (as a "Battelle staff member") because writing to and from will need a lot of time and each day would be important if the 1st June delivery had to be made from the new strain. Please, keep me informed on your talks or correspondence with ASL Farms so that I can refer to particular points in later communications with them.

Yours sincerely,

Dr. W. Miedreich
