### ITL MANUFACTURING CAPACITY OUTSIDE CANADA

Para 38 of the February 1993 TSG Minute refers to the possibility of ITL acquiring manufacturing capacity outside Canada.

Dave Stimson has been in touch with the V-P of Manufacturing at ITL and confirmed:-

- ITL will not be seeking to use either BATCo capacity (trademark restrictions) or B&W capacity.
- ITL are currently looking at linking with a third-party US manufacturer.

ITL will review the situation with Ulrich Herter when UH visits Canada.
