Dear Erhard,

I have now had an opportunity to discuss with Public Affairs the question you raised regarding Prof. Mohr's project.

Despite the fact that we readily agree the results of the examination he has in mind could be of considerable interest to the tobacco industry, it is not felt possible to recommend that B.A.T becomes directly associated with the work.

When next we meet I shall give you more details of the background leading up to this decision.

Thank you for giving us the opportunity of participating.

With kind regards,
Yours sincerely,

L.C.F. BLACKMAN
