POTASSIUM CARBONATE TREATMENT
OF STEMS

I enclose copy of a letter received this morning from Simey in South Africa writing to Bob Wade in Canada, which is of considerable interest. I would also draw your attention to item 1302 on page 2 of R. and D.E.'s Quarterly Report - April/June, 1964.

In addition, I enclose a packet of KRONE cigarettes from Hamburg. These are the cigarettes I mentioned yesterday which have been made with a carbonate treatment of stem. I see that this carbonate treatment reduces tar, phenols and nicotine and, according to Simey, irritation on his South African tobacco.
