

URGENT to lab  
for 37 55

DR. D. G. FELTON,  
SOUTHAMPTON.

SYE/BGM/33

          
P.F.L.

In the last Quarterly Report under 3417 there is nothing reported. I think it is a matter of some urgency now to get any information on the optimum D.P. of P.E.I. into our patent structure and also into use if we can. Certainly we should avoid doing any biological tests on P.E.I. on anything less than the best we can achieve. It would be a good idea to summarise what we know as an R.I.S.

J. GREEN.
