OK to meet  
in Denmark

Scientific Research Group Meeting - October 1989

The Scientific Research Group started life by representing the CAC companies (and BATUKE) on smoking and health issues. It is a small group of senior scientists who assess trends in this area. Representation has never been on a one scientist per company basis - we just try to get the best people. More recently we have had participation from Switzerland and Denmark.

We now have an invitation to hold an October meeting in Copenhagen with the full agreement of Mr Hugo Schroder. This venue will be cost effective as one of the proposed speakers for the meeting is from Copenhagen and others are anticipated from Northern Germany.

May I have your agreement to this meeting please?

Should you wish to know more about the meeting I will only be available in the next fortnight on Monday, 15th May a.m. (due to a visit to the USA and Canada) but Dr Boyse would be able to answer any queries.

R E Thornton

c.c. Mr A L Heard  
Dr S Boyse
