Kretek Style Products

In the light of recent developments (John Downie's enquiry), it should be pointed out that a number of Operating Companies have expressed an interest in producing/importing cigarettes containing cloves for use in their domestic market.

The Companies that I am aware of that have expressed an interest are:

Malaysia (received chopped cloves ex Indonesia in late 1984)

Singapore

Hong Kong (limited interest/comment)

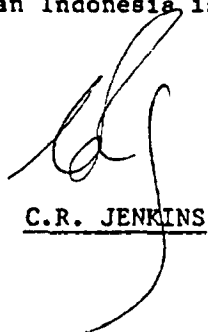

Canada

U.S.A. (limited interest)

Brazil (kretek style flavours supplied in 1983 for 'new' taste).

Australia (considering importing from Indonesia).

It was pointed out to John Downie that the A.C.P. provisional limit for territories other than Indonesia is 2mg eugenol in smoke/cigarette.
