Dear Stuart

As you are aware, at the initial meeting of the Scientific Research Group it was decided that we should attempt to compile a database containing a list of all externally-funded projects related to smoking & health. I currently have a list of the projects that were being funded in 1985, and would be very grateful if you could send me an up-dated list so that we can computerise the list of projects. Ideally, we would like not just a title, but an objective of the research, a research report should they exist, an idea of the length of support (and dates) and the sum of money involved.

If it is possible for you to obtain a list of projects funded by the CMTC we would be grateful for this information too.

If further projects should arise during the course of the next year, I would be grateful if you could automatically send me the appropriate information.

With kind regards

Yours sincerely

Dr Sharon Boyse
