Dr. Thornton and I have produced this set of minutes on the meeting with the Canadians. I am not sure whether you wish to distribute them or purely retain them for your own purposes. We, at least, found the process of producing these minutes useful in clarifying the outcome of the meeting.

Probably the greatest difference in approach, however, was in the belief, held by ITL, that authorities can ever be convinced of the acceptability of smoking contrasting with the view expressed by BAT that there will always be a strong anti-faction that will introduce new 'goal posts' for which we must be prepared.
