

NOTE FOR: C H STEWART LOCKHART ESQ

SEH COMMUNICATION/DNA

I did not bother you with this matter at the time, but now enclose some notes and correspondence which are self-explanatory. I do indeed hope that we have not jeopardized our developing good relations.

Ironically, Bob Ely, Alex Corini, myself and others have just spent two days with Ernest Pepples and Wilson Wyatt (head of Public Affairs, BAC) agreeing the talk that I was to give at the DNA meeting - but is now available for use within the Company and also for external groups where the general press are not present (at least at this stage).

I enclose a note by Pepples that summarizes his understanding of our discussion and agreement - which includes the decision to have my talk reproduced in leaflet form for distribution to B.C.'s etc for use as seen fit within their own territories.
