MONTREAL,
P.Q.,
Canada, H3C 3L6.

Dear Pat,

Following Alan Heard's return to GR&DC, he mentioned that he had spent some time talking about coal retention: I believe with Cathy McBride. As I understood it, you have undertaken some more development of the B. & W. method and are getting sensible results with Virginia cigarettes. Further, it seems that you may be beginning to work out some correlations between coal retention and other physical characteristics.

Alan commented that he would very much like us to coordinate with yourselves in this work and I would be very pleased if you could update me on the current situation in Montreal.

With kind regards,

Yours sincerely,

S.R. EVELYN
